Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

Claim 5 is objected to because of the following informalities: the word "is" in line 1 appears to be a typographical error. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 3-4, 8-13, and 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by *Phillips, III (6,082,011)*.

As to **claims 1, 10, and 15**, Phillips discloses a laser plane vehicle alignment system, comprising:

Art Unit: 2877

a main part, a light source (20) and a number of contact points (16), the light source provided to emit a light beam in one plane; and

an indicator device that is part of the plane (26) (col. 8, lines 45-50, 60-68 and col. 8, lines 1-2).

As to **claim 3**, Phillips discloses everything claimed, as applied above, in addition the contact points are attachment devices (col. 8, lines 48-50).

As to **claims 4 and 11**, Phillips discloses everything claimed, as applied above, in addition the scattering plane is parallel to the alignable plane (col. 8, lines 60-63).

As to **claim 8**, Phillips discloses everything claimed, as applied above, in addition the contact points allow movement in two perpendicular coordinates (col. 8, lines 47-55).

As to **claim 9**, Phillips discloses everything claimed, as applied above, in addition the planes are walls (see fig. 1).

As to **claim 12**, Phillips discloses everything claimed, as applied above, in addition the indicator device comprises a part for attachment and a body provided with a measurement mark (col. 8, lines 65-71).

As to **claim 13**, Phillips discloses everything claimed, as applied above, in addition the light beam essentially coincides with the measurement mark (col. 8, lines 65-71).

As to **claim 16**, Phillips discloses a laser plane vehicle alignment system, comprising:
providing a main part (12), a light source (20), and a number of contact points (16);
emitting a light beam in one plane;
arranging an indicator device on the alignable plane;

Art Unit: 2877

adjusting the alignable plane with regards with marks on the indicator device (col. 8, line 41-col. 7, line 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patent ability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over *Phillips III* (6,082,011).

As to **claim 14**, Phillips discloses everything claimed, as applied above, with the exception of at least three indicator device, however it would have been obvious to one having ordinary skill in the art at the time of invention to include three indicator devices since it has been held that a duplication of part is within the level or ordinary skill of a worker in the art.

Allowable Subject Matter

Claims 2 and 5-7 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, taken alone or in combination, fails to disclose or render obvious displaceable contact points or a rotatable arm.

Art Unit: 2877

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lill (4,375,130) discloses a method for adjusting the toe of the steerable wheel on a vehicle relative to the average rolling direction of the vehicle non-steerable wheels.

Guaraldi et al (5,233,761) discloses a system for the alignment of several machine units arranged in series.
